very worth \$3

buy it now, do not pass go, do not collect 200 tabs

WARNING: more addictive than Electronic Super Joy. You should buy this if you love hard puzzles dipped in psychedelic goo.. This is a good platformer, the rotation-of-the-world-gimmick is well implemented and explored in many ways. The game is difficult at times but not ridiculous. The trippiness is sometimes a hinderance. The controls are good but sometimes the jump is not as sharp as one would wish.. I can see sounds now. This game is AmazeBawls!
